

# How to submit your abstract?

1. Register on Overleaf (<https://www.overleaf.com/register>). This is a free online tool to typeset documents easily with L<sup>A</sup>T<sub>E</sub>X.
2. Once you confirmed your e-mail address, log in to Overleaf, go on <https://bit.ly/2BTSu3H> and click on the “Open as Template” button (Figure 1).
3. In the left banner, click directly on the file named `Name_FirstName_Abstract.tex` to open it: in here you can write your abstract, set its title as well as the author names and affiliations. Be sure to follow carefully the instructions given there.
4. If you want to add a figure to your abstract (which we strongly discourage as an abstract should be concise and clear enough with its text), copy-paste the following piece of code in your `Name_FirstName_Abstract.tex` file:

```
\begin{figure}[h]
  \centering
  % FIGURE FILE WITH EXTENSION (.jpg, .png, .pdf)
  \includegraphics[width=0.75\textwidth]{figure.jpg}
  % FIGURE CAPTION
  \caption{A beautiful figure.}
  % (FACULTATIVE) FIGURE LABEL, CALLED IN TEXT WITH \ref{figure_label}
  \label{figure_label}
\end{figure}
```

Of course, to see your figure in Overleaf you need to upload it first: this is possible clicking on the third button below the “Menu” button in the upper left corner (Figure 3).

5. To see the (beautiful) result of your writing, click on the “Recompile” button (Figure 2).
6. Once you are satisfied with your text, click on the “Menu” button in the upper left corner (Figure 3), then on “Source” (Figure 4) to download an archive of your abstract.
7. On your computer, unzip this archive and rename the `Name_FirstName_Abstract.tex` file to replace the `Name_FirstName` part by your name and first name following the requested syntax (e.g., if your name is Bruce Willis, `Name_FirstName_Abstract.tex` becomes `Willis_Bruce_Abstract.tex`). **Should you not follow this rule, your abstract will not be accepted straightforwardly.**
8. At the time of submitting your abstract on the JED website (<https://jed3m2019nantes.sciencesconf.org/>),
  - (a) at the “Metadata” step, write anything in the “Abstract” box (however if you used some complicated L<sup>A</sup>T<sub>E</sub>X packages for your abstract, write them down here as shown in Figure 5); there is absolutely no need to paste the text of your abstract here,

(b) at the “File(s)” step, upload **only** your Name\_FirstName\_Abstract.tex file from your computer **and the eventual figure you called in this file** (Figure 6). The “TYPE OF THE FILE” asked afterwards does not matter (Figure 7).

9. You are done with your abstract writing and submission: congratulations!
